Drain Rate: 30" per hour
Full Roll: 15 x 100'

Warranty: 10 years

Flammability Test: Pass *see 27 page report at ChiTurf.com

Lead Test: Pass *see 27 page report at ChiTurf.com

Solar Status: UV resistant

Turf Temp Rating: - 15%

Softness Rating: 4 of 5

Visual Rating: 4 of 5

Intended Use: Landscape, sports field, roof decks, Moderate to Heavy use areas of larger sq/ft sizes

"The Streeterville is arguably our best "bang for the buck" turf grass and probably our most popular. It's a perfect balance of high performance, superior aesthetics and a great price. It's high performance commercial grade turf that bridges the gap between our more high traffic based lower pile height pet focused products to our higher pile height super lush more urban landscape based turf products. Very nice to the touch but also very wear resistant and responds very well to brushing which means the blades snap back into a more vertical setting once broomed. It's a great fit for moderate to heavy traffic areas. backyards, roof decks, sport fields and children's play areas where a higher performance built in GMAX is desired." - The ChiTurf Team
